

# The Village of Loami needs your HELP complying with the Illinois EPA

The Illinois Lead Service Line Replacement and Notification Act requires a comprehensive inventory of water service lines and pipe materials. The City has no knowledge of lead service lines, but requires verification from residents. Please complete the survey and return as soon as possible in person, or via phone

## Lead Pipe Water Service Line Survey

### How do I test my service pipe material?

1. Locate the main water service line feeding into your building.
2. Using a flathead screwdriver and a refrigerator magnet, you can perform the pipe material tests below.

Material	Lead Pipes	Copper Pipes	Galvanized Pipes	Plastic Pipes
Scratch Test	Scraped area is shiny silver and leaves deep scratch	Scraped area is shiny like a copper penny	Scraped area remains dull grey	Smooth and rubbery texture to the touch
Magnet Test			Sticks	
Tapping Test	Dull metallic noise	Metallic ringing noise	Metallic ringing noise	Muffled tick

Please fill out the information below to the best of your knowledge and return to the Village of Loami by April 1, 2024.

Name: \_\_\_\_\_

Service Address: \_\_\_\_\_

Year service line installed, if known: \_\_\_\_\_

Service line material, circle which one applies:

Lead Pipe    Copper Pipe    Galvanized Pipe    Plastic Pipe    Unknown

\*Use above image to determine the line material
